

Regulation No. 19 - The Control of Lead Hazards Overview of Potential Rulemaking and Stakeholder Engagement Opportunities

The Colorado Department of Public Health and Environment, Air Pollution Control Division ("Division") is providing this overview document for public review and requests comments on potential revisions to Regulation No. 19. The Division will hold an initial stakeholder public meeting on Tuesday, March 9th, 2021 from 5 - 6:30 pm. This will be a remote "kickoff" meeting to discuss the rulemaking process and proposed topics. An agenda and meeting logistics will be provided upon registration.

Proposed Scope of Revisions:

Below please find a proposed outline of potential revisions to Regulation No. 19:

1. Update source materials incorporated by references
2. Update definitions, remove language that is no longer applicable or appropriate and correct typographical errors
3. Clarify work practices and containment requirements
4. Update clearance and lead dust hazard levels
5. Revise Training and Certification requirements

Initial Written Comments:

The Division is providing this overview document for public review and requests initial comments on the potential revisions to Regulation No. 19. Please submit suggested topics to cdphe.commentsapcd@state.co.us using "Regulation No. 19 - Lead-based Paint Revision Comments" in the subject line. Comments may continue to be submitted to this address through the stakeholder process.
